More loops at inference solve longer chains than seen in training (trained on d = 1-8)
looped r=8 (trained with 8 loops)
random loop count (1-8) (trained with 8 loops on average 4.5)
answer accuracy (mean over 5 seeds; band = min-max)
steps in the chain (d)
steps in the chain (d)
4 loops at inference
8 loops at inference
16 loops at inference
32 loops at inference
dense 36 layers (same depth as 8 loops)
