(a) One step per loop
one step per loop
loops = steps
r=8
first loop where x_j is decodable
intermediate value x_j
(b) Several steps per loop
one step per loop
r=2
r=4
random
intermediate value x_j
(c) Dense models (per seed)
dense, 20 layers
dense, 36 layers
first layer where x_j is decodable
intermediate value x_j
